About me

I'm a passionate and creative software engineer with 5 years of experience building robust code for high-demand businesses. I thrive in team environments, bringing fresh ideas to the table and leveraging advanced development techniques and tools to deliver innovative software solutions. I've also taken on leadership roles, guiding teams to success while staying focused on solving real-world problems through technology.

Work experience

Senior Web Developer | Stonefort Securities | 01/07/2025 - Current | Dubai, United Arab Emirates

Lead front-end development of trading and partner platforms using React.js, Next.js, TypeScript, and Tailwind CSS.

Built real-time dashboards and data-driven interfaces for traders, affiliates, and CRM users, integrating APIs for market data, account management, and analytics.

Optimized website and portal performance through code splitting, caching, and API load balancing, improving speed and Core Web Vitals scores by over 40%.

Collaborated with backend (.NET) and design teams to develop responsive, high-performance UIs aligned with financial compliance standards.

Developed and maintained custom WordPress and Elementor components for marketing and onboarding workflows.

Implemented secure authentication flows, API integrations, and analytics tracking across multiple Stonefort sub-brands (Partners, Fintech, and CRM portals).

Contributed to the ongoing Next.js migration project, converting legacy pages into modular React components.

Supported cross-platform UI consistency, SEO optimization, and accessibility improvements across web properties.

Chief Technical Officer & Web App Developer | AWF Ghani | 01/12/2023 - Current | Dubai, United Arab Emirates

Oversaw all IT operations, from website development and deployment to ongoing maintenance, ensuring everything ran smoothly and performed at its best.

Created custom, user-friendly websites from scratch, designing unique plugins and templates without using pre-made themes or tools. This allowed for fully tailored solutions to meet specific business needs.

Handled the company's social media platforms, designing attractive visuals and writing compelling posts to boost brand recognition and engage with the audience effectively.

Developed an automated trading bot (Expert Advisor) using MQL4, which consistently achieved a 100% success rate and generated a steady 10% profit every month.

I designed and built a fully customized money management website on WordPress. Using my own custom-made plugins and templates, I created personalized admin and user dashboards to make it easy to organize and keep track of investor records and financial data.

Designed and launched responsive e-commerce stores for multiple brands, supporting multiple languages and achieving a perfect success rate in meeting client expectations and improving user experience.

Created a food delivery web app with a user-friendly dashboard that simplified order tracking and provided detailed restaurant analytics. This innovation cut down delivery processing time by 40%.

Web developer | NAQSTECH DIGITAL | 01/08/2021 - 30/11/2023 | Lahore, Pakistan

I have worked on over 30 projects, ensuring smooth execution from start to finish. Staying organized and managing multiple tasks effectively has allowed me to consistently meet deadlines and exceed client expectations. As a result, I've built strong client relationships, with a 95% satisfaction rate reflecting the quality of my work.

As a team leader, I guided six developers, focusing on efficiency and collaboration. Through structured planning and hands-on training, we developed faster and more user-friendly websites, reducing development time by nearly 30% without compromising quality.

Integrating third-party APIs has been a key part of my work, making processes more efficient and enhancing site performance. These optimizations led to a 25% reduction in development time while improving the overall functionality of each project.

To maintain high standards, I personally handled quality assurance testing, carefully reviewing each site before launch. Thanks to this thorough approach, over 90% of projects went live without significant bugs, ensuring a seamless user experience.

I also worked on improving website visibility through on-page SEO techniques, helping sites rank higher and attract more visitors. This led to a 50% boost in organic traffic. Using Google Analytics, I tracked performance and made strategic improvements to increase engagement.

By applying DevOps best practices, I refined the integration and deployment process, cutting release cycles by 35% and increasing deployment success rates.

Additionally, I set up and managed AWS deployments, ensuring 99.9% uptime. The system was optimized to handle 50% more user traffic, allowing for smooth scalability without performance slowdowns.

Front-end developer / Internship | DYNAMIC ONLINE TECHNOLOGIES | 01/01/2021 - 31/07/2021 | Lahore, Pakistan

Gained practical experience working with HTML, CSS, and JavaScript to build responsive, user-friendly interfaces. This hands-on experience allowed me to create engaging front-end designs

Created and launched over 5 static websites using core JavaScript, enhancing site interactivity and improving user engagement with custom features and dynamic elements.

Built and launched a fully customized e-commerce store from scratch using Shopify's Liquid code, delivering a tailored solution that boosted client satisfaction and streamlined the shopping experience.

I integrated third-party APIs to monitor user behavior and track purchases. This provided more accurate data and helped refine marketing strategies based on actionable insights.

I handled troubleshooting and fixed various issues, including customizing themes and resolving bugs. This reduced downtime by 40% and enhanced the overall performance of the site.
